IMPORTANT INFORMATION

Pets are seen by appointment only.

Pets must be registered to schedule an appointment.

Registration forms can be picked up at the clinic during hours of operation or found on our Facebook page.

A heartworm test (canines) is required annually for the purchase of heartworm preventive.

Canines and felines in base housing must be microchipped, and up to date on the rabies vaccine.

Puppy and kitten vaccines

All puppies 8 weeks of age or older and all kittens 9 weeks of age or older should be seen by a veterinarian for their first set of vaccines. The vaccination process for puppies and kittens is a series of 3 visits to vaccinate against distemper/parvo, feline distemper and rabies.

Health Certificates

Our staff is happy to assist you with your domestic or international health certificate. The further in advance you notify our staff the better we can assist you in making your PCS a smooth transition.

If you are going to be traveling by plane within the continental US you will be required to have a domestic health certificate for your pet. Please call and schedule an appointment before your departure date.

*The veterinary clinic and its staff are not responsible for ensuring that requirements are met. Please visit www.usda.aphis.gov
